

ANSIS Public Records Users Guide

PLEASE read this entire guide prior to making a record in the system. It is important that you understand everything in it and enter things correctly so your new ID will print out correctly.

ANSIS (American National Sovereignty Identification System) is a Public Record system that allows the People to document their Natural Law identity and political self-determinations, and to create an ID in a standard form that will become recognizable to government revenue generators. No one can challenge your determinations and no court can decide political questions. It is imperative that you not only make the determinations, but place them in the Public Record so they can be time stamped and verified as needed.

Once the record is entered into the system, you will be able to print a copy of the record suitable for use as Identification when acting in your Private sovereign capacity. The record is time stamped, verifiable, and when signed by two witnesses can be used as evidence in any matter where a government officer acting under color of law exceeds his authority and/or causes an injury.

Who can make a record?

As noted in the Declaration of Independence, all Men are created equal and endowed with certain unalienable rights. The right to identify yourself and make political determinations in your own way are among them. Anyone who is over the age of 18 years and competent to make an affidavit can make a record in the ANSIS system.

How do I make an ANSIS Public Record?

It is very easy to create an ANSIS record. First go to the ANSIS.org website and click on the Post a Record link. Once you do that, you will be taken to a form to fill out. ALL BLANKS MUST BE FILLED OUT

Use the instructions that follow on each of the entries:

Record Number – The first item is the record number. It has to be a unique 10 digit number. I recommend your phone number so it will be easy to remember, but it can be anything you like so long as another user has not recorded the same number. Whatever you use, make sure you can remember it because it will allow verification of the record even if you don't have your ID handy.

Common Law Name – Next you will need to provide a Common Law name. It can be anything you want it to be, but it should be something that you answer to in every day life. I used my first and middle name, not including the last name. The reason is that you will not want to be associated with the government created LEGAL PERSON while you are not acting in that capacity. Government keeps track of its LEGAL PERSONS by a full name and date of birth it commandeered when you were born,

followed by the Social Security Number. If given the opportunity, they will try to convert your name into the LEGAL PERSON, so make sure there is a distinction between the two and that what you provide on the form is one you will easily be able to answer to.

Date of Creation – The next item is a Date of Creation. As mentioned above, your actual birthday was co-opted by the government when it created the LEGAL PERSON and it uses it as a main identification point for the entity. At ANSIS you will estimate your date of conception and use that date instead. Just go back 9 months from your birthday and you will end up with actual date you were created by God. You were created upon conception after all. It is not meant as a falsification of facts, but is a legitimate means of separation from the LEGAL PERSON. If ever asked for a date of birth, you will need to be able to say you were created on this date without hesitation.

Email Address - Next you will need to provide an email address. Use a good and PERMANENT address. Nobody from ANSIS will ever send you an email, but it will show up on your printed record as a Contact Method. That provides anyone needing to contact you later with a way to do so and satisfies that requirement of a valid Identification. Also, as the system grows and there are many thousands of ANSIS records, the database will be searchable by state so people in the same area can come together to protect each other when government goes awry.

Mailing Address – You do not need to put an actual address in this block, but it is essential to claim it as Private information on the ID form you print out after completing the record. I just used the word “**Private**” to indicate that the information was not public and therefore could not be shared with a public official. There is no valid reason an officer would need it other than as a place to harass (arrest) you at later. Another Contact Method is readily available in case they need to contact you for legitimate reasons.

Physical Characteristics – The next four blocks are for physical characteristics. Basic information like height, weight, hair color and eye color. These are all items that anyone in your presence can determine on their own and provided as a way to validate the ID in the field. Be accurate with your entries and use the correct format so they will print out correctly on the form.

Political Determinations - The next section of the form is for political Determinations. Because a revenue officers job is gathering evidence, it is important to provide your political determinations for the record. Otherwise, those determinations will be presumed in a way that suits the governments interest at your expense. Just as a Drivers License proves you are a government officer, your entries in these blanks will prove your standing in Natural Law and place you outside of their statutory, color of law jurisdiction.

Jurisdiction – What jurisdiction are you in? I used **Natural Law**, which is what everyone should use. However, you can put something else. Perhaps you like “Common Law”, which is really just another form of Man's Law, but more protective than a statutory jurisdiction government maintains for it's entities. Natural Law (aka Gods Law) is supreme to all other Law and where you should want to be.

Domicile – Domicile is very important. Your government ID places you in a corporate domicile, namely Washington, DC or more commonly referred to as UNITED STATES. That subjects you to any and all codes passed by any and all governments because the UNITED STATES is the mother corporation of all of them. You are under no obligation to provide or accept a domicile within a corporation. I chose “Nature” as my domicile, where Natural Law reigns supreme. Some may want to

choose something like “Constitutional (your state), but I feel that could be used fraudulently to remove you to the corporate jurisdiction of the State of _____ franchise. I have a Natural Right to live in Nature under Natural Law and I don't want anybody to get confused over that so I plainly state it.

Nationality – Everybody was born somewhere, and that is called nationality. In order to remain outside of the UNITED STATES corporate jurisdictions, you must be somewhat specific in stating that you were born in a sovereign state outside of the corporate UNITED STATES. That is, one of the 50 states. In order to claim the protections (from government) of the state constitutions, you need to specify which one of them. I used “Tennessee National” as my nationality, and I suggest you just put the National after whatever state you are in. That will also help when other ANSIS people are searching for people nearby to come together to help them, or if you need help from other ANSIS people.

Citizenship – Most people have been misled to believe they are U.S. citizens. It is a legal reality that a U.S. citizen is a legal entity, not a valid form of natural citizenship. All U.S. citizens are presumed to be domiciled in Washington, DC, which is NOT what you want to be. If your nationality is in a constitutional state, your citizenship must also be constitutional. I just put the word “Constitutional” in this blank and suggest you do the same.

Allegiance – Allegiance is another thing the government abuses by the presumption you have allegiance to it. Before making your determination you should understand what it means.

It is defined in normal usage as “loyalty or commitment of a subordinate to a superior or of an individual to a group or cause”.

The legal definition is as follows:

By allegiance is meant the obligation of fidelity and obedience which the individual owes to the government under which he lives, or to his sovereign in return for the protection he receives. It may be an absolute and permanent obligation, or it may be a qualified and temporary one. The citizen or subject owes an absolute and permanent allegiance to his government or sovereign, or at least until, by **some open and distinct act** (making an ANSIS declaration), he renounces it and becomes a citizen or subject of another government or another sovereign.

What does all that mean? It means that your allegiance is to your sovereign, or your Creator. In America, government is NOT sovereign, the People are. By presuming you have an allegiance to it, government can claim sovereignty over you when it rightfully belongs to God who created you.

I give my allegiance to God, who is my Sovereign. You could also choose to put None in the blank if you so choose. But who will argue with God as your choice?

Just remember that whatever you put here will make you subordinate to who or whatever you enter.

Government Office / Employment – This is simply a reiteration that you DO NOT work for or hold office with the government when you are engaging in your Private affairs. Simply put None in the blank, even if you work for the government when you are on the clock. Nobody works 24/7.

What happens after I submit the form?

Once you have filled out the form, go over everything again. Check for capitalization and formatting. It is very important that these things be correct before hitting the SUBMIT button.

The reason accuracy is important is that once the SUBMIT button has been pressed, the program will submit it directly to the database AND create a printable, time stamped record of exactly what has been submitted. Any typos will show up, and we don't really want that on our ID.

It is important that you print out the form immediately. It is your proof the record was submitted, and just as importantly when. I also suggest that you print it out to a PDF file so you can reprint it as needed. If needed, you can also print out the ID again using the search function on the site.

Once you have printed the form, you will see that on the bottom there is a place for you and TWO witnesses to sign. In the Common Law, two witnesses are required to give validity to a document. I chose to do it that way rather than Notarization because there should be no need to involve the government in your private business.

You can and should also place a photo of yourself in the block provided, as well as a thumbprint which acts as your own UNIQUE seal. Have the witnesses seal their signatures as well.

Once that is done, laminate the entire page on both sides. Laminating paper can be had at Walmart or an office supply store. Once the completed ID is laminated, make a fold directly under the table between the table and the thumbprint/photo sections. Then put the bottom of the page into that fold for the finishing fold. Place the folded ID under a book for the night and when you wake up you will have a nice trifold ID that looks just like every other ANSIS ID.

Return to the site as new and important information about how and when to use your ID will be added.

Don't forget to tell your witnesses about the site and let them create their own IDs. It is FREE to do and the real power of ANSIS will grow with every record made. When there are tens of thousands of People using ANSIS identification documents, they will be noticed, recognizable, and accepted by government officers without question.
